Experience

Microblink *Senior Technical Writer* April 2025 – Present

- Sole technical writer at the company; established the documentation framework, which included the overall strategy, cross-team processes, as well as technical changes. I own docs.microblink.com.
- Wrote SDK (Javascript, Kotlin, Swift) integration guides, as well as API references and integration guides.
- Migrated all existing documentation to docs-as-code and wrote the CI/CD for deploying the docs website.
- Set up versioning, tests, AI agent workflows; performed several migrations of legacy systems and completed an information architecture overhaul.
- Worked on developer experience: reduced time-to-hello-world for four product lines, made documentation available to AI agents, spoke to users directly and prioritized work based on their feedback.
- Contributed to a major API redesign (v2 -> v3).
- Solved frequent bottlenecks where users couldn't accomplish certain tasks by writing specific how-to guides, which reduced the number of requests to Support and Solutions teams.
- Created guidelines for AI usage in docs; built numerous sample applications to test releases.

ReversingLabs *Senior Technical Writer* February 2024 – April 2025

- Led the initiative to build a public documentation portal, working directly on the architecture, infrastructure, and automation, and reducing support ticket load.
- Wrote feature release docs, participated in API design sessions.
- Co-owned docs.reversinglabs.com.

ReversingLabs *Technical Writer* October 2020 – February 2024

- Advocated for and created a CI/CD system for building, testing, and publishing documentation, which reduced dependency on local scripts and ensured repeatable builds.
- Completed an information architecture reorganization, which reduced content duplication and significantly increased clarity and visibility.
- Wrote the entire OpenAPI specification for the company's cloud APIs, created the publishing tooling and implemented automated tests for code samples, improving developer experience.

Alkemist, Algebra *Technical translator / editor (contract)* September 2016 – July 2023

- Translated technical manuals and regulations in the field of electricity distribution and cybersecurity.
- Reviewed high school textbooks in the field of programmable logic controllers and video game graphics.

Skills

- Documentation engineering and developer experience strategy.
- Javascript, Python, Bash, C, x86 Assembly, SQL, HTML/CSS.
- Markup languages: LaTeX, MDX, reStructuredText, and AsciiDoc. SSGs: Docusaurus, Hugo, Sphinx.
- Shell scripting, automation, Git, GitHub Actions. Container tools: Docker/Podman and Kubernetes.
- Security: Active Directory, web app and network pentesting, fuzzing and scanning tools.
- Collaboration tools: Jira, Confluence, Google Workspace.
- AI agent orchestration and workflow automation.
- Languages: Croatian (native), English (native level). Fluent in French and Swedish. Beginner-level German.

Education

Faculty of Humanities and Social Sciences, University of Zagreb

M.A. French language and literature / Swedish language and culture
September 2013 – September 2016
B.A. French language and literature / Swedish language and culture
September 2010 – September 2013

Courses

- Responsive Web Development (freeCodeCamp)
- Certified Penetration Testing Specialist (Hack The Box) (ongoing)
